

AHWSG – Working Trials Research

The Activities Health and Welfare Sub-Group noted that there was still ongoing discussions and queries from the Working Trials research group about getting further funding for additional research to be carried out. It was noted that the previous request for funding was far in excess of any funding available to the AHWSG.

The Working Trials jump research will be going to the Dog Health Groups next meeting, with the aim to try and extend the understanding of what Working Trials dogs are experiencing when traversing the varies equipment.
